My Knowledge Organiser - The Stone Age

How do we know about this Time Period?

This time is often called 'Prehistory' as there is no writing left by the people who lived then which would tell us about their lives. Archaeologists dig down through the earth to find things which have been left behind from long ago. They have found tools, cave paintings, and large stone buildings. They have found tools, cave paintings, and large stone buildings.

Archaeology - The study of the buildings, arts, tools and other objects that belonged to people in the past, in order to learn about their life and environment.

Archaeologist - Person who investigates the past.

Hunting and gathering - Anything left over from the past is a source of evidence - The objects or archaeological discoveries are a gift.
